Art Unit 154

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-20, drawn to a building panel, classified in Class 428, subclass 304.4.

II. Claims 21-31, drawn to a process for making a building panel, classified in Class 156, subclass 78.

III. Claims 32-41, drawn to a building material and a process for making a building material, classified in Class 521, subclass 55.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and of Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the panel of Group I could be made by a materially different process such as extruding hot expanding or expanded polystyrene between and in contact with two skins or by more than a single disclosed process as applicant admits such as set out on pages 3-6 in the specification.

Inventions of Group I^{or} of Group II, and of Group III are related as combination and subcombination. Inventions in this

relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because no adhesive present. The subcombination has separate utility such as a paper weight.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and since the fields of search are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication should be directed to William J. Van Balen at telephone number (703) 308-2351.
